It's Easy to Make a Luxuriant Gurney Lawn

1 Preparation of the ground is important. First, plow or spade deeply. Level off the area to be planted and rake to remove sticks, trash, stones, or lumps.

2 Roll the lawn thoroughly. This allows you to plant the seed more evenly, plus providing a firmer seed bed.

3 Sow the seed, generally using one lb. of lawn seed to every 225 square feet.

4 Rake carefully to work the seed slightly into the soil.

5 Again roll lawn, using a roller or packer. This is important. Keep it well watered (each day) for the next 2 or 3 weeks. Moisture is necessary for proper germination.
